

Intelligent Play.

making sport smart.

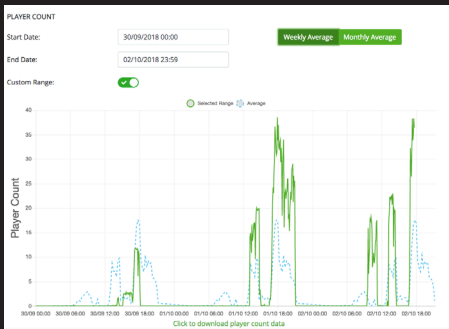

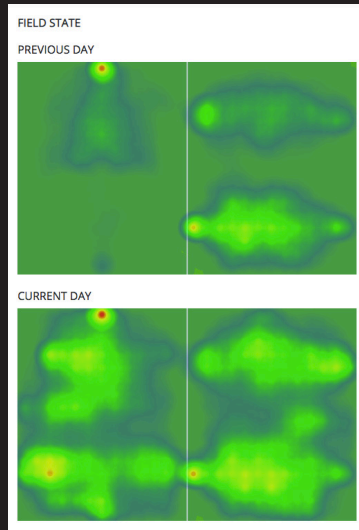

Play better. Play longer. Play safer.

The only pitch management system using artificial intelligence and machine learning

Intelligent Play is more advanced than any other technology available for sports pitch management. Removing the risks of human error, miscalculation or poor or incorrect reporting, Intelligent Play provides you with detailed, accurate data and reports to help you manage your sports pitches in a “smart” way.

By tracking usage, participation and machine maintenance, Intelligent Play delivers you real-time information and alerts about the status of your pitch.

The data provided by Intelligent Play gives users clear indication of the maintenance required after usage to bring the pitch back to optimum performance and safety levels. Maintenance activities can be scheduled and tracked in the dashboard.

Graphs and reports are easily customised and generated for on-screen viewing and are also available as pdf downloads.

Intelligent Play was developed to solve issues faced by sports facility owners and management

PITCH PERFORMANCE
Making your pitches play better

PLAYER SAFETY
Making your pitches play safer

INNOVATION & TECHNOLOGY
Making your pitches play longer

ENVIRONMENT
Making your pitches play greener

 Small, discreet sensors

 Low voltage power dependency

 Wireless 4G connection

 Weather-proof

 Long range to easily monitor a full-size pitch

 Automated notifications

Whilst Intelligent Play already offers an advanced and unique pitch management solution, we are committed to ongoing development to provide users with new and improved features regularly. Users are also welcome to submit their ideas and requirements to us for consideration in our development plans.

“ This innovation is so advanced, it provides me with the unique ability to track usage & monitor pitch performance parameters remotely. As a direct result, we are now providing better quality, safer playing surfaces for our England National Football Teams ”

Scott Brooks, Head of Grounds & Estates
St. George's Park, The FA

“ It does the work for you & takes away a lot of admin. It also enables my facility manager to manage his staff & lets me easily export data for board and project meetings ”

George Wells, Head of Commercial & Operations
Rectory Park, Middlesex FA

“ The system has already greatly simplified & modernised our maintenance efforts. I can track how and when my facility is used and maintained right from my office. We're excited by how this technology can enhance our efforts to protect and utilise our field ”

Jasper Jewell, Director of Athletics
Atlanta Public Schools
